OMT TRAINING

SHOCKWAVE THERAPY
FOR CLINICAL PRACTICE

8HRS CPD

Austin Duy Nguyen

Has successfully completed an 8-hour online course in Radial Extracorporeal Shockwave Therapy (rESWT), covering theory, current evidence base, clinical indications and contraindications, safety procedures, parameter selection, and the practical integration of shockwave therapy into musculoskeletal clinical practice.

This course focused on evidence-informed clinical application and safe implementation within the practitioner's regulated scope of practice.
