Add-on prices (+£) are extras to a treatment session. 24 hours' notice required for cancellations. 10% NHS staff & student discount with valid ID.

YOUR FIRST VISIT

01 Case history

We listen carefully — symptoms, work, sport, and what you want to get back to.

02 Examination

Movement and hands-on assessment to find the cause, not just the sore spot.

03 Treatment & plan

Care starts when appropriate, with clear advice for recovery between visits.

PATIENTS SAY

“Austin found the cause quickly and I was moving freely again within a few sessions.”

Sarah M. · Back pain

“Shockwave for my stubborn heel pain made a real difference when other approaches had stalled.”

James T. · Shockwave therapy

Focused shockwave

Low-intensity focused shockwave for persistent soft-tissue and tendon problems that need more than hands-on care alone.

Men's health & ED

Discreet LI-ESWT protocols in a private setting — drug-free and non-invasive, with a clear clinical plan.
